

Why hiring pages are weaker than filled roles.

**A job page can be stale.
It may outlive the role, the
hiring plan, or the team.**

A job page can be duplicated.
One role can appear in several places without a filled seat.

**A job page can be unfilled.
An open listing is not a
headcount change.**

**Use hiring pages as a
prompt for a question.
Then look for other public
evidence.**

**Public data helps form a
diligence list.**

**Follow GitDealFlow for the
engineering-side checklist.**
