

PitchBook, Crunchbase and GitHub answer different diligence questions.

Public GitHub activity for research and diligence.

gitdealflow.com

**Company databases can
help with company identity,
people, and market context.**

**Funding databases can help
with disclosed financing and
investor context.**

Public GitHub activity can help with public engineering-surface questions.

Public GitHub activity for research and diligence.

gitdealflow.com

**No one source is a diligence
system.
Each has blind spots and
lag.**

**The useful workflow is
comparison.
What changed, what is
public, and what still needs
verification?**

Use tools together.

**Follow GitDealFlow for one
applied example next week.**
